K5TIT – Texas Interconnect Team

Setup ID-1 for Data Operations to the Internet

Open the CS window

YOUR   Enter the call sign of the repeater
(UR)   Example   K5TIT

REPEATER

RPT1   Enter the call sign of the repeater
       Example   K5TIT**A

       The * is a space.

RPT2   Enter the call sign of the repeater and click the G button
       This will put the G on the end of the call for you.
       Example   K5TIT**G

       MY   This is the call sign in the Gateway system.
               Example N5ZPR or N5ZPR**B

       You must use the correct call sign/IP combination
       Example   Radio 1   N5ZPR   10.#.#.98
                        Radio 2   N5ZPR**B   10.#.#.99
                        Radio 3   N5ZPR**C   10.#.#.100

       The * is a space.

Computer Setup

The computer used with the radio must have the fixed IP address assigned to the call sign.

       IP   Assigned Address
       Netmask   255.0.0.0
       GW   10.0.0.1
       DNS   10.0.0.1
